**INQUIRY INTO LONG TERM SUSTAINABILITY AND
FUTURE OF THE TIMBER AND FOREST PRODUCTS
INDUSTRY**

Name: Mr Boyd Robinson

Date Received: 21 May 2021

I want all logging of old growth and native forest stopped immediately. There is a extinction crisis happening across Australia due to loss of habitat and climate change. Intact healthy, native forest is the key to saving native species, especially vulnerable species like the Koala etc.

We need our forests for more than the timber industry which should only be allowed to harvest plantation timber specifically grown for timber production.

State forests in good condition should be rehabilitated into Nature Reserves or National Park for us and the future generations to enjoy,
