INQUIRY INTO ROAD TOLLING REGIMES

Name: Mr Tristan Masterson

Date Received: 19 May 2021

Why are politicians allowed to get away with such corruption regarding these rip off roads?

Why do we pay registration, stamp duty, license fees, disgusting fines and many other useless fees etc for roads and upkeep when the government does private deals with and legislates for banks and foreign companies who own these roads, all to then retire from politics and take up jobs with said companies and banks?

How can the body tasked with the power to make laws for the peace, welfare, and good government of New South Wales make legislation that enables private citizens to be targeted, harassed and forced to pay even further exorbitant fees (above the rip off toll fees) on said toll roads if that person chooses not to install that private companies RFID chip in their vehicle?

Will Mike Baird be prosecuted for doing his funny deals, gutting ICAC and then taking up a cushy job with the bank thats reaping the rewards of these dodgy deals?

Why is the NSW government using hivision cameras from the CCP on these roads to attack and enslave Australians in debt and turn this country into an Orwellian nightmare?

Many of you should be disgusted by your conduct and to have the gall to call yourselves honorable is a disgrace. You should be accountable to the people, however as seen in the latest elections within the USA, many people have lost faith in the process due to the arrogance in which you operate without consequence, it almost seems that the major parties are aware that they cannot lose.
