**INQUIRY INTO LONG TERM SUSTAINABILITY AND
FUTURE OF THE TIMBER AND FOREST PRODUCTS
INDUSTRY**

Name: Mr Roger Seccombe

Date Received: 27 May 2021

The devastating impacts of native forest logging:

The 19-20 bushfires hit NSW state forestshard –impacting both biodiversity and timber supply.

Native forest logging is impacting many local environments and communities.

Further impacts of native forest logging:

increased fire risk, reduced carbon storage, damage to water resources,undermining eco-tourism opportunities and harming biodiversity.

All communities will benefit from a sustainable forestry industry, with no native forest logging !!
