As you will see this is the first time I have ever done a submission. I am very worried about logging in our Native Forest . I have been camping at cod-hole in Dorrigo plateau, Nymboi-Binderay National Park , I saw & took pictures of the area's which had been logged everything was gone, it was very sad. We did not see any tall old trees at all on our travels. The impacts of native harvest logging is not being done like in the past of selective logging. We need a sustainable future for this industry, many more plantation estate. We need to protect our ecosystems. Please please do the right thing & stop native forest logging, look at the tourism benefits of native forest. Let the forest heal from the fires. THIS IS IN YOUR HANDS
