**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR
TUNNEL AND BEACHES LINK**

Name: Name suppressed

Date Received: 4 June 2021

Partially
Confidential

I wish to voice my strong objection to the building of the second Harbour crossing, designed to join up with the West Connex development on 2 grounds:

1. The excavation of the tunnel across the Harbour will inevitably cause water and air pollution because the construction process will disturb toxic chemicals lying on the floor of the Harbour. This will negatively impact local residents and the local Dawn Fraser pool.
2. The excavation of the tunnel under our suburb will cause enormous traffic disruption on our narrow roads for a period of years, and will compromise the integrity of many of our homes
