**INQUIRY INTO LONG TERM SUSTAINABILITY AND
FUTURE OF THE TIMBER AND FOREST PRODUCTS
INDUSTRY**

Name: Nicholas Leeding

Date Received: 22 May 2021

Dear Committee,

Please see below my submission into the Inquiry into Long term sustainability and future of the timber and forest products industry.

I am writing as a NSW resident, voter and bird lover who is deeply concerned about the decline and extinction of all native birds and other animals.

Unless decisive action is taken to protect the remaining forest habitat across their range and improve and fund management actions, Swift Parrots could be extinct within the next two decades.

Climate change and biodiversity loss are the most important – and interdependent – human induced environmental challenges that society faces today, threatening people's lives and well-being. Nature-based solutions are key to tackling both these challenges. Nature-based solutions such as protecting native forests are key to meeting the UNFCCC's Paris Agreement goals of mitigating and adapting to climate change; Globally, they can provide over 30% of the climate mitigation action needed by 2030 to prevent global temperature rise above 1.5°C, above which the IPCC warns we would see damaging and irreversible impacts to all life on earth.

Intact, biodiverse ecosystems, such as forests, are particularly efficient and cost - effective nature-based solutions, as they sequester and store significantly more carbon when compared to monoculture tree plantations, agriculture and grazed lands, in addition to conserving biodiversity and providing a range of other ecosystem services. They are also more resilient, functional and able to adapt to a warming climate.

This inquiry has the opportunity to recommend critical actions that can save and even expand the native forests and secure a more environmentally sustainable future for the timber industry. In considering the future of the timber industry in NSW, I urge you to consider the following recommendations.

Recommendation(s):

- Immediately and permanently suspend all current and planned forestry operations in all old growth native forests.
- Amend the CIOFA to exclude all known and potential Swift Parrot foraging habitat.
- Amend the CIOFA to address the effects of climate change, including increased bush fires and droughts.
- Conserve remaining intact native forests and facilitate the expansion and connectivity of old growth native forests.
- Develop a forest industry transition plan with a focus on wood production from sustainable and appropriately placed plantations.
- Invest in sustainable tourism infrastructure and opportunities for local communities, tapping into the economic value and services of natural areas in NSW.
- Explore nature-based solution incentives, such as carbon markets, to finance forest conservation.

Yours sincerely,
Nicholas Leeding
