

**Submission  
No 130**

**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR  
TUNNEL AND BEACHES LINK**

**Name:** Mrs Carol Breislin

**Date Received:** 12 June 2021

---

1. I object to the fact there has been no proper risk assessment undertaken to ensure the safety of children, residents, sporting groups, commuters and workers.
2. I object to the proposed use of Flat Rock Gully as a major dig site because of the high risk of contamination from toxic waste which has been confirmed as being buried under this site.
3. I object to the destruction of over 500 precious trees in a bushland corridor that is a very valuable natural asset for the many members of the Willoughby community, not to mention the animals that live there.
4. I object to the resulting noise, air and water pollution from ongoing tunnelling that will operate six days a week for up to seven years.
5. I also object to the fact that no public transport options have been considered that would deliver a more efficient and environmentally friendly solution.

Please help save this very precious part of my neighbourhood. It's where I go to walk, think, breathe, exercise. We need spaces like this for our mental health.
