**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR
TUNNEL AND BEACHES LINK**

Name: Name suppressed

Date Received: 12 June 2021

Partially
Confidential

The Beaches link tunnel is both uneconomical to build and will also have a huge impact on native fauna and floral in the lower northern beaches as well as marine species around the spit. When deciding whether this project is appropriate or not please ensure these are taken into consideration as this tunnel will have a lengthy impact on both natural and public health in the area.
