**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR
TUNNEL AND BEACHES LINK**

Name: Name suppressed

Date Received: 13 June 2021

Partially
Confidential

I am gravely concerned about the impact of the Northern Beaches Tunnel and building site in proximity to the children at Balgowlah Boys NB Campus

Yes children. Let's keep that word front of mind.

Children who should not be exposed to harmful toxins. Children who have one shot at schooling and will either have all windows shut, even less place to play and exercise and will have their learning destroyed by the tunnel by them.

Move the campus to the freshwater secondary campus during construction. It's as simple as that. Don't have the freshwater campus as a secondary campus during this time.

Or move everything that will affect the children's learning - all sites near the Bally campus so they can still learn effectively and be children

Thanks in advance
