**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR
TUNNEL AND BEACHES LINK**

Name: Mr Chris Tran

Date Received: 14 June 2021

I object to the development due to the contaminants in the ground that will be dug up and disturbed in Flat Rock Gully. I live at the top of the gully and my young daughters will be severely affected due to the dust and debris that will be in the atmosphere. They're 4.5 years old and 1.5 years old and I WILL NOT deal with compromise of my daughter's health. WE ALL KNOW that asbestos and certain chemicals cause harm when breathed in. We do not want to have clusters of cancers in this area, all because of this development. I'm also very concerned with the noise that will be generated. Noise travels, especially if the site is getting used at all hours. Depending on the wind flow, we can hear the trains pulling out of the station at Artarmon.

Also, with Flat Rock Gully, it would have taken 30-40 years to get it where it is. This development will have effectively undone all the good. We also regularly use the walking track for bush walks down to Tunks Park. We don't need anymore development to remove the very little greenery that we have already.
