**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR  
TUNNEL AND BEACHES LINK**

**Name:** Miss Gem Collinson

**Date Received:** 15 June 2021

---

“Impact of the Western Harbour Tunnel and Beaches Link”.

I have bushwalked here for years, and released lots of wildlife such as echidnas, wallaby's, rare birds and endangered wildlife. This is not the spot to build a tunnel.

There is rock art in caves, indigenous culture tracks, and tonnes of wildlife and plantation.

I am very upset, so is many people.

please please dont build all this stuff here, i know the government wont listen but at least you dont have to build the whole thing including two ovals and the excess stuff around the tunnel, I hate the thought of cutting anything down but at a thought you could just keep it as a tunnel.....??? less impact.

please consider nature first. we dont need this. I get to the city very quickly, everyone just needs to take it slow its not a race.

we are hurting our environment.
