**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR
TUNNEL AND BEACHES LINK**

Name: Robert Mills

Date Received: 15 June 2021

To whom it may concern,

I have grave concerns for the unfiltered stack in Balgowlah as my daughter has bad asthma and we will be living up the hill from the stack. My daughter has been hospitalised for her asthma in the past and I see this as being a severe health threat to her and other sufferers of asthma. The other concerns refer to the removal of 3500 trees to further reduce air quality in the area is absolutely disgusting.

The loss of water flow to burnt bridge creek and potential run off into manly dam will be disastrous to the environment, not to mention dredging up sludge at the spit which will spread through the harbour.

This project is an absolute disaster and I hope all Involved will be prosecuted for their negligence.

King regards,
Robert Mills
