**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR
TUNNEL AND BEACHES LINK**

Name: Name suppressed

Date Received: 16 June 2021

Partially
Confidential

I stand behind the submission from St Cecilia's Catholic Primary School, Balgowlah. As a parent who was involved in that submission, there are a number of mistakes in the EIS that have not been addressed.

Further, I believe that, due to lack of public awareness, water quality has not been sufficiently discussed with the community. A copy-paste from a previous project is not enough, and further engineering is required that is specific to this project. Specifically, water treatment plants and emergency procedures for fires or spills in the tunnel have not been communicated in an easy-to-understand manner, for the public to understand. In my opinion there is a major risk of impact on Manly Dam and on Queenscliff lagoon - I am not convinced that this risk is understood.
