**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR
TUNNEL AND BEACHES LINK**

Name: Name suppressed

Date Received: 16 June 2021

Partially
Confidential

I object to the construction of the Western Harbour Tunnel

My concerns relate to the inevitable spillage of contaminated material causing environmental damage to Sydney Harbour

And to disruption and noise disturbance with vibrations and inevitable cracking of dwellings along the tunnel route plus heavy vehicle movements to be experienced for years

A major concern is regarding air pollution from UNFILTERED STACKS to be built beside the Rozelle rail yards which is unconscionable

If construction of this tunnel is inevitable then I would add that lack of incorporation of public transport in the project is short-sighted
