**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR
TUNNEL AND BEACHES LINK**

Name: Name suppressed

Date Received: 16 June 2021

Partially
Confidential

I have thoroughly attended all the presentations and read the full reports but there are significant details which are inadequate or not properly quantified for a project which has major impacts and concerns in the following areas :

- The air quality and health impacts for so many adults and children
- the ground contamination by tunneling through contaminated underground landfill and resultant air , water, marine and harbour contamination
- complete inadequate evaluation of alternative transport systems which would be at significantly lower cost and with much lower environmental impact.

These proposals have not been released to the public.

- Financial transparency on the financial case.

The surveyed information confirmed that by far the majority of the public are against this project ,at great cost to us the taxpayer.
