

Submission  
No 293

**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR  
TUNNEL AND BEACHES LINK**

**Name:** Name suppressed

**Date Received:** 18 June 2021

---

Partially  
Confidential

We are objecting to the Beaches Link Project because of

1. Confirmed contamination risks due to Flat Rock Gully being an old tip site, putting health and environment waterways at risk.
2. Loss of 390 trees and green space and wildlife and habitat.
3. Impacts on residents due to noise, construction vehicles on Flat Rock Drive, and geological uncertainty with fears of property damage due to vibration.
4. A tunnel encourages more cars on the road, when alternative options providing public transport have not been considered.
