**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR
TUNNEL AND BEACHES LINK**

Name: Ms June Lunsmann

Date Received: 17 June 2021

Partially
Confidential

I object to the dive site at Yurulbin point because of the impact on surrounding residents and destruction of the significant aboriginal site under the rock to lhs of the wharf as previously referred to, be withheld.

Overall I object to

1. The fact that existing pollutants have not been fully assessed and remediated. If not, the longterm pollution of the harbour will continue due vibration of traffic passing through the tunnel. This greatly impacts on the existing harbourside pools.

Where will the dredged material go?

2. The long term effects of noise and vibration on existing residents in Birchgrove and the North Shore. Still no positive assistance to residents for a dilapidation report on their properties apart from a contribution towards an expensive report.

3. Lack of public transport access in the tunnel just creates more cars on the road.

4. Still no remediation of flooding on Wakehurst Parkway.
