**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR
TUNNEL AND BEACHES LINK**

Name: Name suppressed

Date Received: 18 June 2021

Partially
Confidential

I strongly object to the Western Harbour and Beaches Link tunnels for a number of reasons including:

- the unfiltered smoke stacks are completely unacceptable in a high concentration residential area with nearby schools. The health of the public must come before cost. If NSW can't afford it then the project shouldn't commence.
- It encourages more private vehicles on our roads, public transport should be encouraged as the roads are already so congested, not to mention the environmental impact.
- Suitable alternatives should be thoroughly reviewed before further steps are taken
- The dive site at Flat Rock Gully is in a Wildlife Protection area and as such should be relocated so it is adjacent to the baseball area and therefore can be easily rehabilitated.
