

INQUIRY INTO ROAD TOLLING REGIMES

Name: Name suppressed

Date Received: 3 July 2021

Partially
Confidential

My 3,300kg 6.3 meter long motorhome is toll charged the same as a 40,000kg semi trailer. The key is the maximum height which has to be no more than 2.8mtrs high, mine is 3.3mtrs high. This is a total scam and RIP off as nowhere in Australia will you find a motorhome 2.8mtrs high or less, which mean ALL motorhomes will be charged the same as a semitrailer. The government needs to base these tolls on weight only as height has nothing to do with wear and tear on our motorways, which I believe to be the reason of high charges for trucks and semis. Plz explain and plz make the appropriate changes to these charges. thankyou.
