INQUIRY INTO ROAD TOLLING REGIMES

Name: Mr David Lee

Date Received: 4 July 2021

Dear All

As a resident of south western Sydney we have no choice but to use tollway wherever go, M5 two tolls (we get a cash back for old M5 less GST) M7 which is over \$7 dollars each way then it's moves to M2 , and various other tollways. It seems absolutely unfair to pay all this tolls to just be able to move from one side of the city to the other side, and most of the at the peak hours traffic doesn't move but we still have to pay the tolls.

We as residents feel helpless to do anything as the successive governments neglected people of western and south western Sydney in regards to public infrastructure including good affordable public transport.

This must stop building more toll roads (and hopefully dismantling current ones too)we need publicly owned infrastructure and investment in public transport.

I hope this inquiry comes to the same conclusion

Best regards
David
