**INQUIRY INTO FURTHER INQUIRY INTO THE
REGULATION OF BUILDING STANDARDS**

Name: Mr Michael Green

Date Received: 3 July 2021

An extraordinary housing building boom has occurred and is continuing to occur in the Ryde electorate. Already we know a number of buildings are clad with easily combustible materials. This must not be allowed to continue. The safety risks and economic risks are too great. A completely independent body but have authority to certify a building for occupancy. This, as we have seen elsewhere can be a matter of life and death.

I request this matter be given immediate and urgent attention before any further catastrophe occurs.

Yours truly
Michael Green
