**INQUIRY INTO FURTHER INQUIRY INTO THE
REGULATION OF BUILDING STANDARDS**

Name: Ms Jacqueline Marks

Date Received: 4 July 2021

The Opal and Mascot Towers are an example of the need for greater regulation and government oversight into building certification. Private certification is fraught with the challenges of compromise around independence. I support the inquiry into regulation of building standards and look forward to the committee holding government and developers to account and as a minimum ensuring that standards are upheld.
