Heritage listings.

Question 11. Would streamlining enhance the the process

I don't agree with streamlining the heritage process. Listings need time to be well considered and for the community to be advised of the possibility of destruction of existing sites. Action to streamline is not protective. Heritage needs protection.

Question 14. How could we improve heritage consideration within land use planning

Make sure there are no conflicts of interest and that heritage consultants are employed. Also that councils are resourced to understand the value of retaining heritage listed sites.
