

**INQUIRY INTO ACQUISITION OF LAND IN RELATION TO
MAJOR TRANSPORT PROJECTS**

Name: Name suppressed

Date Received: 2 July 2021

Partially
Confidential

First of all We agree with government Aerotropolis project is an exciting event , once in a life time and all the positive changes and opportunity it brings with it , employment, business, infrastructure, new universities, international hub, but you doing it on our land or close to it should've you compensate us for that??? shouldn't that positive change reflect on locals land owners???

During last year and 3 months meeting during numerus occasions we were assured That NO ONE WILL BE WORSE Off and that if end up acquiring our land will compensate us same as the CORE.

Initial Plan we were classified as priority growth area , and our subject land as per your draft plan were in the yellow and green,

Lately speaking to _____ Director planning Partnership which he stated that green spine been reduced by 28% and when we showed him our land instead of going down in term of green it went up and he admitted the abnormality.

Same thing on our one to one meeting with planning NSW _____ admitted the abnormality when we showed _____ the different between the two draft plan and how it went wore for us and they asked us to right to which we doing now.

We did public submission and that said that green zone or spine been reduced by 30% . Guess what my area increased by 30 % and now we are 100% flood instead 70% as plans attached. so justice required for you to push the flood zone to 40 or 50% flood on our land .

In term of flood of the experience of owners for the last 45 years , not once the experience flood or anything close to that.

On 24 October 2018 Brett Whitworth (Acting Deputy Secretary , planning , design at department of planning and environment told us and on too many times that no one will be worse off and if we acquire the green spine it will be compensated same as core.

On human, personal site we are impact hugely but we don't show it up and put brave face because our kids even though we can't hide it totally as they see it on our daily behaviour.

Stress effecting our relation as husband and wife and our relation with our kids as we are always on edge and we hate that we are in this position cause by our government

I am _____ diagnosed lately with a disease called (Pemphigus vulgaris) immune system deficiency . And my treating professor think it because the stress I am going through and currently I am going through intense chemical, biological treatment.

We feel betrayed, deceived and unfairly treated by our government to let this happen, when we pay our taxes, working hard for ourselves and country decently, never deceived, stole or commit a crime in any sort AND to come and face what DPP decided is injustice not looking or caring on what damage their decision is causing to land owners is a crime itself. We asking to be treated fairly not to be ripped us off by our own government.
