INQUIRY INTO REVIEW OF THE HERITAGE ACT 1977

Name: Michelle Jones

Date Received: 4 July 2021

The people of NSW expect the government to look after and care for our heritage assets, not sell off and/or demolish them.

It is a disgraceful moment in time for the history and heritage of NSW when you expect people to have to provide submissions to protect our heritage in NSW.

It's amazing how low Gladys and her government will go to get their hands on and sell off the heritage assets of NSW to benefit their developer mates and obviously getting personal kick backs for these deals.

We shouldn't be wasting parliament time and money on gathering submissions to save our heritage we should be using it to have a proper inquiry into the rorts and corruption of this government that requested this so they can authorise to destroy the heritage assets that belong to the people of NSW, they don't personally belong to the current destructive NSW government, and that is why there is laws in regards to protecting our heritage, to protect us against governments such as this current government who want to destroy and destruct our heritage which is evident in this current inquiry by them and why there is this submission request, that most of the NSW public know nothing about.

I see the want to demolish or even try to move Willow Grove as an attack on our heritage, we don't have any skilled company with the experience and knowledge of destructing this building and putting it in storage and then putting it back together exactly as it is today. So it will be a costly exercise that will fail, and then we'll be told accidents happen when they destroy parts of it in the process.

Also the grounds that Willow Grove are on are part of its heritage. Moving it elsewhere will never be the same and will ruin its heritage value and the history of Willow Grove.

To me, the attempt to demolish and/move Willow Grove elsewhere would be like the Victorian Government destroying Rippon Lea in Elsternwick, Victoria an inner Melbourne suburb, and therefore in my eyes is the NSW Government trying to murder and destroy our Heritage in our state. We don't have many of our old historic buildings left and all that are remaining should be preserved and maintained for our state and national heritage assets including their buildings and the grounds they are on.
