INQUIRY INTO ROAD TOLLING REGIMES

Name: Mr David Barber

Date Received: 5 July 2021

Personally I think toll roads are classist, the ability to drive on a road should not come down to economic choice. But when we have this coins of devision in society the problem is that people fall through the cracks. "I am one of these people".

I have ADHD as an adult, the stigma around this curse and I say curse is because of how debilitating it is. A toll road could be the difference between me being at work on time so I don't loose my job. Not only that, I unfortunately due to organisational problems associated with my ADHD forget to fix my etoll pass and now I get charged by a private company admin fees for my illness. This is a disgrace and inhuman because it shouldn't be allowed. Furthermore, let's address the constitutional problem at hand here. I pay tax, I pay registration which is my road tax. Why am

I been further taxed to use a road that the government gave money to Westconnex for to build. This most likely will fall on deaths door. However I hope by reaching out to the very institutions that this country calls a democracy that common sense prevails.
