False claims on behalf of Transurban on a paid bill

Transurban did not follow the tolling legislation in this matter deciding to take my company to court with out my knowledge when I in fact had a paid bill .

There is no government minister who you can discuss there faults with and Transurban seem to be able to do whatever they like disregarding legislation and procedures. Wich has coused me to lose my buisness in there false and misleading claims .no government agency can seem to control them and now government organisations is looking into this issue I have reported to ASIC ACCC fair trading local members transport minister and even the premier with out any success with evidence of a toll bill for over 10 years
