

INQUIRY INTO FLOODPLAIN HARVESTING

Name: Name suppressed

Date Received: 12 July 2021

Partially
Confidential

I would like to see an official inquiry into water theft. The current situation in the Murray Darling river basin, is absolutely atrocious. Massive cotton farms owned by multi national corporations, and millionaires, and politicians are greener than a steamed broccoli, while farmers and their properties, and rural communities, have water shortages, they have fish kills and elevated levels of blue green algae which are contributing to Motor Neurone Disease in some areas.

All perpetrated by the (dis)honorable Giovanni Dominic (pork) Barilaro, and the Nationals, end this absolute injustice and atrocious water theft.
