

INQUIRY INTO FLOODPLAIN HARVESTING

Name: Name suppressed

Date Received: 12 July 2021

Partially
Confidential

With an increase of cotton farming in the local district, close to all natural water flow into our family property has been stemmed. The neighbouring property runs a ploy pipe into our property from their water storage which collects close to all natural water flow. Behaviour of this sort is detrimental to fellow farmers and the environment at large. It is in the best interest of the wider economy to discourage this behaviour with clearer regulations and policies.
