## **INQUIRY INTO FLOODPLAIN HARVESTING**

**Name:** Brendan Paniagua

**Date Received:** 12 July 2021

---

I support an inquiry into the usage of floodplain harvesting. I believe that it is being used unethically by those in the northern basin of the Murray Darling River and is causing harm for regional communities in the southern basin, both psychologically and environmentally. We should do what we can to stop, or at the very least lessen, the suffering of these communities.
