

INQUIRY INTO FLOODPLAIN HARVESTING

Name: Name suppressed

Date Received: 12 July 2021

Partially
Confidential

I would like to lodge this submission for an inquiry into Floodplain Harvesting, as I feel it is a pressing issue into the water systems of rural NSW and requires greater action and transparency to hold those abusing the rivers and water systems accountable. This issue is significantly impactful not only on the environment, causing detrimental damage to wildlife and rural farming (south river) but also major health risks for surrounding town communities. It feels that without a proper inquiry and solution many ripple effects occur as water is an essential component for sustaining all factors of environment, community and health.
