

INQUIRY INTO ROAD TOLLING REGIMES

Name: Name suppressed

Date Received: 8 July 2021

Partially
Confidential

Tolls are too expensive, people can't afford to pay high amounts for tolls that the time it saves costs more money than the time it takes them to turn it.

People shouldn't have to pay a toll to just sit in track work or tolls with road works.

Why can't we build the tolls with borrowed money and put a toll on it to pay it off. Once it is paid off we had a maintenance toll to it at a reduced rate. Keep the tolls owned by the government to keep costs down.

If toll companies are building tolls for a profit and by the time contract has ended they have made 5x their money back we should be able to build ourselves to keep toll costs down.

Build tolls in the first place to keep up with demand of growing city.
