**INQUIRY INTO IMPACT OF THE WESTERN HARBOUR
TUNNEL AND BEACHES LINK**

Name: Miss Bevin Aston

Date Received: 18 June 2021

I strongly object to this project. My 6 year old son goes to Anzac Park Public School and I do not want him and other local school kids sucking in fumes from unfiltered stacks. We regularly walk and cycle around Flat Rock Gully and cannot believe that major parts of it will be destroyed. I thought the government was trying to reduce the impacts of climate change and yet you continue to be moving ahead with toxic toll road tunnels rather than investing in sustainable public transport. It feels like this whole process is obsolete. I dont think that any of you are taking any interest in these objections and will move ahead with your plans with no regard for the local opinions being raised. Shame on you all!
