

INQUIRY INTO FLOODPLAIN HARVESTING

Name: Name suppressed

Date Received: 12 July 2021

Partially
Confidential

As a concerned Private Citizen of NSW, I want to ask you all to take into account how Flood Plain Harvesting is impacting the lives of the people South on the Murray-Darling River. The water is not a commodity it is a life force and stopping it from reaching its furthest point is criminal and cruel. I accept that water is needed for crops but it is also needed to sustain life... the life of the people, the plants, and the animals. The River should be for everyone, not overseas investors not for millionaire farmers but for Australians. Please make sure the CAP is fair and is monitored honestly. Thank you
