INQUIRY INTO FLOODPLAIN HARVESTING

Name: Miss Zahlia Hamer

Date Received: 12 July 2021

To whom it may concern,

After research into flood plain harvesting and it's multiple environmental detriments it has come to my attention, as well as the publics, that this needs to be stopped. The fact that we have country towns of a mortality rate of 37 directly caused by loss of water due to flood plain harvesting is a disgusting act. The only thing that is evident of flood plain harvesting is greed. Greed for power, greed for money. You will find that the only people opposed to getting rid of flood plain harvesting and capping water supply are those with wealth, those with power, those with a stake in water. Those that are actively killing the environment and the Australian people who surround the southern parts of the basin. Please, for the future of our environment, the future of the Australian people and Indigenous communities. Do better. Do not let this heinous act of water theft become legal.
