

INQUIRY INTO FLOODPLAIN HARVESTING

Name: Mr Victor Pernet

Date Received: 13 July 2021

Hello, I live in France and I watched a video entitled "Blood Water: the war for Australia's water" from the journalist channel friendlyjordies talking about the state of water in your country. It's really grave, it's an issue that must be addressed. If you think you're already doing it, you're wrong. Watch the previously mentioned video and you'll understand that.

You might be wondering, why do I bother at all, submitting about a country that isn't mine's issues. Well, above my nationality, I value life. I value the life of human beings as well as the life of the environment. I also value democracy, as well as free speech. I value these things and therefore I submit, because they're all in danger. Lives are endangered by infested water, by lack of water, by expensive water. Democracy is endangered by lies, by hidden facts about authorities, looking to smoke the truth and preventing people from making objective decisions.

Citizens of your country are actually risking to lose their very basic rights : to live, and to speak. If you value democracy and life, please listen to them, please help them.

Sincerely
