INQUIRY INTO FLOODPLAIN HARVESTING

Name: Miss Danielle Marke

Date Received: 13 July 2021

Floodplain harvesting should be licensed, metered and monitored by a public regulatory committee not a private organisation. We have had almost 40 years of the Murray darling Basin being destroyed by the unregulated and untaxed cotton industry. Enough is enough. It is literally causing people to kill themselves. For what? An extra dollar in the pocket of Jim Cush. The community of Griffith are literally drinking blue-green algae which is giving them MND. Motor Neuron Disease. They're being told they'll die within 1-3 years and there is nothing that can be done. Because of the WATER. Or lack of.

THIS IS OUTRAGEOUS. It should be illegal. I have no faith in the coalition government or the Gladys/Barilado government and they should step down immediately.
