

INQUIRY INTO FLOODPLAIN HARVESTING

Name: Name suppressed

Date Received: 13 July 2021

Partially
Confidential

I have never written a submission before.

I'm not sure what to include in this so I'll make it simple. There needs to be an independent investigation into whatever is going on with water shortages in the Murray Darling basin in NSW, one particular issue being floodplain harvesting. Communities are being affected, people are becoming sick and losing their livelihoods and the environment is dying.

Regulation around water licencing and usage needs to be fair for those upstream AND downstream and should somehow be structured so as to not incentivise profit. I suspect that is how certain parties got us here in the first place. The corruption and lies stop here.
