

INQUIRY INTO FLOODPLAIN HARVESTING

Name: Name suppressed

Date Received: 15 July 2021

Partially
Confidential

It is my request that, during the inquiry into flood plain harvesting, serious consideration is made to criminalise this practice. Furthermore, I wish to see inquiries into the sustainability of cotton growing in Australia. When considering these options I hope to see real scientific sources (those that can be found on engines such as pubmed, NCBI and google scholar) considered. Consideration of people's living downstream to major flood plain harvesters should be considered. The very act of using water as a tradable commodity must be consider.

Regards
