INQUIRY INTO FLOODPLAIN HARVESTING

Name: Name suppressed

Date Received: 16 July 2021

Partially
Confidential

I am concerned with the nature in which water is being used as a commodity throughout NSW. I am concerned that a large number of everyday, hardworking Australians are facing hardships that have been created through pampering and pleasing a small number of already well-off Australians and foreign investors. I am concerned that Australian's are forced to pay tax on their water gains, while foreign investors are not.

I am shocked that action has not been taken to better protect Australians - particularly those in southern NSW, from the effects of floodplain harvesting.

We have a beautiful country with incredible ecosystems. Let us not ruin these ecosystems, and the lives of thousands of Australians, to line the pockets of the 1%.
