## **INQUIRY INTO FLOODPLAIN HARVESTING**

**Name:** Mr Oliver Elliot

**Date Received:** 23 July 2021

---

Flood plain harvesting should remain illegal and be enforced.

It is clear there are great injustices happening.

The state and management of the river systems is regrettable and embarrassing. There seems to be a great lack of care for neither human life or the natural ecosystems.

Another example of putting profits over all other things, including the lives and livelihoods of our fellow man.

We all should be ashamed and take this opportunity to make a change for the better.
