INQUIRY INTO FLOODPLAIN HARVESTING

Name: Dr Annie Truong

Date Received: 26 July 2021

As a citizen of Australia I demand that there be an inquiry into water harvesting water theft , and tax avoidance around it , this is not a fair go for our country nor is it a fair go for our small farmers and indigenous owners already doing it hard in tough conditions and ecological damages caused by the operation , we have high suicide rates in Australia from people doing it hard and you allow multinationals to do this to those you claim to represent , I demand inquiry and investigation and more importantly ACTION to cease and desist this activity and our farmers and indigenous communities compensated for damages
