

INQUIRY INTO FLOODPLAIN HARVESTING

Name: Name suppressed

Date Received: 20 July 2021

Partially
Confidential

The floodplain harvesting I don't agree that they should be able to harvest water 5 years in advances, which means they are harvesting 5 years ahead of time. which is leading to no water for the Menindee lakes. And that the Darling is not supplying water to the Murray system. Us in the southern base are not allowed to harvest any of the flood water.

The Darling river is now allowed to run dry down stream of the Menindee lakes and leaving communities without water

I don't agree with how this is allowed to happen with floodplain harvesting I would like to know how its meted and regulated under the 2000 water act.

The extra environmental water being pushed down the Murray is coursing major soil erosion down stream of the Barmah choke
