## **INQUIRY INTO FLOODPLAIN HARVESTING**

**Name:** Mr David Hilton

**Date Received:** 12 August 2021

---

To whom it may concern.

It is blatantly obvious the floodplain harvesting and the Basin Authority not releasing enough environmental flow is leading to catastrophe for our magnificent river system. This mighty river system exists not for just the big irrigators that are in the pocket of major political parties.

It's time to give the water back to the environment and allowed the flora and fauna to thrive which in turn will support the people and towns along its' course. The water scientists and the recent Royal Commission has shown what is happening now is wrong.

This inquiry into the unlawfulness of flood plain harvesting will no doubt recommend massive changes in order to rescue this mighty river system.

Thank you

David Hilton
