Confidential

I do not represent a group or vested interest, I do however value our unique flora and fauna and feel they need protection especially during these extremely critical times with fires, flooding and excessive land clearing.

Living in a such a beautiful part of the world adjacent to a koala corridor I would love to see this preserved. My limited experience with landholders/ farmers nearby who seem to have very little concern about biodiversity offsets, money talks and getting fined has no impact, there needs to be a lot more follow up to make sure these offsets are actually in place to make sure there is protection for our unique flora and fauna.

Please ensure this happens to maintain and improve what we have for now and the future.

Kind Regards
