**INQUIRY INTO PLANNING AND DELIVERY OF SCHOOL
INFRASTRUCTURE IN NEW SOUTH WALES**

Name: Mrs Barbara Exton

Date Received: 21 January 2022

Milperra university has been put up for redevelopment and I totally oppose this development the land that the university sits on was given for education purposes and should remain as a education facility

The ex-service gentleman that gifted the land did so to be used for education only to go against his gift and to develop for housing goes against what this gentleman fought for and generously gave

The Canterbury/Bankstown area is in desperate need for more education facilities due to the already increase in population

The grounds could and should be retained as education of be it a public co-Ed school for which the area desperately needs or a sporting school for children of the area
