**INQUIRY INTO PLANNING AND DELIVERY OF SCHOOL
INFRASTRUCTURE IN NEW SOUTH WALES**

Name: Mr Darren Webb

Date Received: 1 February 2022

Hi Committee,

Having been a local resident of Milperra since 1980

I am concerned about the local university being bulldozed and turn into high density housing, this land was granted under an educational purpose zoning, I believe the existing Infrastructure should be utilised for above learning purposes. Having been a student at Milperra primary school, then onto east hills boys high till 1986, for me it makes perfect sense to relocate these both the out of date boys and girls schools to the much more modern university grounds, basically a walk up start with plenty of off street parking, possibly selling some land for housing to be built along ashford ave from Milperra reserve to the M5, the old school grounds could be developed for housing with two local railway stations nearby and easily accessible , just my 2 cents worth, thankyou for your time

Concerned resident

Darren Webb
