**INQUIRY INTO ANIMAL WELFARE POLICY IN NEW
SOUTH WALES**

Name: Mr Jed Canellis
Date Received: 2 February 2022

In my experience with family history of breeding dogs with successful and safe surgical inseminations used to better the breed by using imported and interstate sires instead of being limited to locally (from previous imported sires) time and time again, considering some breeds suffer from infertility as do humans in which we rely on professionals to provide an adequate service.
