**INQUIRY INTO USE OF PRIMATES AND OTHER ANIMALS
IN MEDICAL RESEARCH IN NEW SOUTH WALES**

Name: Name suppressed

Date Received: 2 February 2022

Partially
Confidential

Animal experimentation / cruelty and using an animals body - against their will - and yes it is against their will as if they so forwardly allow you to do whatever you want to them and don't care - I bet they scream, hide, shake, are petrified and in so much suffering, and this cruel and unkind, inhumane barbaric act is completely outdated, it is completely unnecessary ..and can't be replaced for research when dealing with human physiology. Never has and never will suffice. Plus what's done is done and the amount of prior research you have all amounted is sufficient enough - I am not condoning it should ever have happened to begin with.

Have you ever thought of an Australian vote for and against this as a Nation to even consider what the peoples choice would be for a majority vote?

Even an advertised mobile poll / app vote/poll. Moving up the technological tree in these modern (and not medieval) times.

Many people have gone Vegan - many condemn cruelty to animals.

Why are we so backwards across the globe let alone in AUSTRALIA when there are far more technologically advanced options and alternatives to be utilised.

All the research you need has already been done.

You can choose to lead the globe - the first foot forward is always the first step to larger movements.

Choose to end the forced and I will say it evil suffering of the innocent and neglected.

Shame on all involved in such willing cruelty and may the lives of the innocent be saved.
