**INQUIRY INTO PLANNING AND DELIVERY OF SCHOOL  
INFRASTRUCTURE IN NEW SOUTH WALES**

**Name:** Mr David Bentham

**Date Received:** 9 February 2022

---

The planning of future schools Must include a considered SAFETY POLICY IN RELATION TO HOW students are delivered and collected from school particularly on wet days. The amount of staff resources the risks involved are very high at most big schools. The recent build at Jordan Springs is a disgrace and very dangerous despite recent cosmetic changes. The Cost of one child becoming a paraplegic is MANY MILLIONS OF DOLLARS let alone the use of professional staff in the process of supervising the delivering children to the waiting cars. David Bentham. OAM.
